

Bags on Rolls

**The photo shown is an example of bag style only.
Dimensions listed represent the actual size**

Clear plastic bags on rolls offer many benefits in a variety of environments. Whether your application calls for our handy dispenser packs which can be stored in a cabinet or on a shelf, or you plan to use our conventional poly bags on rolls which dispense from three cm (3cm) cores, the ease of use can be tremendously advantageous.

Many of our larger polyethylene bags on rolls are too big to be packed loose in cases, thus the rolls make them practical for you to use and for us to manufacture. These, too, are on three centimetre paper cores (3cm) will accommodate a one inch (1") diameter dispenser bar.

Like the vast majority of our products, these bags are all food safe, FDA approved for packaging or contact with any product intended for human consumption. Only 100% virgin raw materials are used to produce these bags, making them not only safe for food and pharmaceuticals, but also contributing to consistently high quality. We can provide you with an FDA approval letter upon request.

Our large selection of stock items is complemented by our ability to also produce custom sizes. Custom poly bags often cost less than stock poly bags, and our minimum quantity requirements for custom runs may surprise you. You can custom tailor the dimensions to provide a very precise fit and the gauge (thickness) to provide just the right strength.

Clear Retail Plastic Bags

Keeping your products clean and visible for your customers with the use of poly bags is nothing new. This is a proven means of accomplishing more tasks than we can possibly write here.

How Are Poly Bags Used in Retail?

Poly Bags are used in thousands of applications throughout the retail trade. Whether shirt bags, display bags, merchandise bags, self-service bags for bulk items or any of the almost infinite number of other uses, Poly Bags are a critical part of almost any retail business.

Custom poly bags usually offer big savings for those who buy in volume. If stock bag purchase totals more than \$1000 of any particular size, you may have an opportunity to cut your budget by going custom. This may offer more precise sizes, convenient case counts and even options for printing.

Your cost per bag goes down with qualified custom sizes because the cost of warehousing is eliminated by "Make and Ship." Although we can't quote a minimum quantity until we know the specifications, many of our customers have been surprised by the savings available with a relatively low number of Custom Poly Bags.

Have a question about which of our thousands of Poly Bags can best accomplish your goals? Our trained representatives are awaiting your call, chat or email to assist you with selecting correct size, thickness, style and more

Fish Bags (Leak-Proof)

Specifically Formulated for shipping & transport live tropical, fresh or salt water fish and coral for either fresh or salt water aquariums, these leak-proof live fish bags feature reliable waterproof seals.

- o High Quality LDPE w/EVA Additive (lends extra seal strength to prevent leakage.)
- o Heat Sealable
- o 100% Recyclable
- o Good Strength With Gauge Matching Water Capacity Of The Bag Size
- o Good Clarity
- o FDA and USDA Approved - Nothing In These Bags Will Harm Live Fish or Coral
- o Made from 100% Virgin Raw Materials
- o Excellent For Transporting Live Fish or Coral
- o Dimensions Listed in Inches
- o First Dimension Represents the Bag Opening

Important Comparison to Our Competition :

Many of our competitors sell standard poly bags as live fish bags. This will "usually" work. Regular poly bags from Discount Plastic Bags or any other supplier will have occasional seals that leak. These Leak-Proof Fish Bags are guaranteed to have leak-proof seals. They cost more, but they significantly improve the chances that all of your live fish and coral will live and arrive safe and secure to their final destination. If you can accept the risk of intermittent seal failure, see our other poly bags.

Grape and Cherry Bags

These vented, slide seal bags are perfect for storing green beans, cherries, grapes, and other types of fruits and vegetables.

They are made from a strong and resilient low density polyethylene material and have a generous bottom gusset that increases storage space. The bag has six vent holes that allow air to circulate through, helping to preserve product freshness and extend shelf-life.

- o Strong Low Density Material
- o Bottom Gusset Allows Bags to Stand on Their Own and Increases Storage Space
- o Vent Holes Allow Air to Circulate, Prolonging Freshness
- o Ideal For Storing Green Beans, Cherries, and Other Fruits and Vegetables
- o Meet FDA and USDA Requirements For Food Contact

Factory: Habibullah Road, Deshipara, Salna, Gazipur, Bangladesh.

Gusseted Poly Bags

The side gusseted version of industrial poly bags offer all the same advantages of their flat poly bag cousins, but with the added benefit of conformity to items. Whether you are using them as box liners, pallet covers, product protection, equipment covers or any of the literal hundreds of other applications, these bags will assist like nothing else on the market. Tamper reduction, shipping protection, product containment and cleanliness are but a few of the advantages offered by this inexpensive packaging solution.

What is an Industrial Gusseted poly Bag?

The prefix “poly” is used to name many raw materials of various chemical configurations, but the industry recognizes the lone use of the word “poly” to define products made from low density polyethylene (LDPE) and/or linear low density polyethylene (LLDPE). Medium and high densities of polyethylene will always be clearly described on our pages to differentiate them from these more commonly used products.

Discount Plastic Bags offers a huge variety of stock sizes listed individually within the categories below, but we also have the ability to provide competitive pricing, low minimums and fast lead time on your custom requirements. Simply contact us for pricing and availability of your custom sizes or large volume requests. Many customers have saved thousands of dollars by switching to custom as doing so removes the cost of warehousing.

Merchandise Bags w/Cut Handles

Strong, reliable, convenient and affordable.

These are four of the most descriptive words that apply to our HDPE Merchandise Bags with die cut handles.

The low cube dispenser carton makes it easy to fit these bags neatly under your counter.

The HDPE offers high strength at a low gauge. This reduces their environmental impact^a and provides security for your customers as they transport their new goods out of your store. The die cut handle is easy to carry, as it allows for an easy grip or a built in hang hole for a variety of uses. The lighter weight provided by the thin gauge means lower production costs, thus lower prices for you.

These bags are available in the following colors: Beige, Black, Blue, Burgundy, Chocolate, Dark Green, Magenta, Orange, Red, Rose, Silver, Teal Green, White and Yellow

Compared to heavier LDPE merchandise bags.

Low Density Merchandise Bags

Set yourself and your products apart by providing your customers with high quality 50 micron LDPE merchandise bags.

The soft touch of low density polyethylene is a nice touch when you don't want your goods going out in that "crinkly" high density stuff that is best known for its use in making grocery store bags

Both the clear and the white are made from the same high quality virgin material and include a convenient die cut handle to make them easy to carry. Your customers will appreciate the extra step you have taken to protect their purchase in a quality bag.

Potato Bags

Vented potato bags are commonly used by supermarkets and produce stores to hold fresh potatoes. Since the bags are vented, they can prolong the freshness of the potatoes by allowing air to circulate through.

The bags are made of strong and flexible low density polyethylene and have generous side gussets that allow them to hold up to 5 lbs of potatoes. Printed 2 colors, 1 side with "Potatoes - 5 pound" with a graphic showing fresh potatoes.

Vented Produce Bags

Vented produce bags keep your fruits and veggies fresh by allowing air to circulate around them.

Produce Bags on Plastic Header

Linear low density bags on plastic headers have outstanding strength and light weight, making them an excellent choice for a utility storage bag or produce bag.

Packed on a convenient plastic header pack for dispensing.

- o Made From Strong, Light Weight Linear Low Density Polyethylene (LLDPE)
- o Packed on Convenient Plastic Headers for Easy Dispensing
- o Very Easy to Open for Consumers - Unlike Produce Bags on Rolls
- o Can Hang on a Single "J" Hook

Soft Loop Handle Bags

Made from a strong and economical co-extruded polyethylene material that won't rip or tear and offers a high degree of leak protection.

The deep side gussets and square bottom help the bags stand without tipping over. This helps reduce the chance of spilling and allows them to be filled quickly. The bags have an integrated loop handle for your customer's convenience and easy portability.

- o Co-extruded polyethylene for strength and tear protection
- o Great clarity for a better product presentation
- o Extra wide side gussets and square bottom allow bag to stand up on its own
- o Ideal for carrying apples, green beans, cherry tomatoes, and other produce
- o Integrated loop handles for easy carrying
